

We
want to be
the first choice
for all your
healthcare needs.

Surgery at Chestnut Hill Hospital consists of skilled physicians expertly trained in general surgery with advanced training in specialty areas, such as endovascular, colorectal, breast, endocrine, oncology, bariatric and laparoscopic surgeries. We also have fully integrated minimally invasive surgery, including laparoscopic procedures for colon surgery, ventral hernia repair and appendectomy.

Surgery at Chestnut Hill Hospital

Surgery at Chestnut Hill Hospital offers patients the convenience and personal attention of a community hospital with the advanced capabilities of a teaching hospital — all right here in your community.

We are committed to working with you and your primary care physicians to create a complete plan of care that effectively meets specific needs. All surgeons in our group are trained in general and specialty surgical and non-surgical procedures. Any member of our team is available for a consultation or an appointment to meet your schedule.

Surgical Team

Donna J. Barbot, M.D.
